Gentlemen:

Enclosed please find two copies each of the Final Draft Technical Memorandum No. 1 Addendum to the Final Phase I RFI/RI Work Plan for ~~Operable Unit 5~~ (Woman Creek Priority Drainage) of the Rocky Flats Plant.

The TM addresses surface water sampling in Woman Creek and the South Interceptor Ditch, including ponds C-1 and C-2. It has been suggested that the OU5 TMs will be given high priority by the EPA and CDH in an attempt to keep the field activities on schedule and that a TM can be reviewed for approval in about one week. This TM is the first of six TMs for OU5 and will be implemented upon arrival.

If you have any questions or comments, please contact Jen Pepe of my staff at 966-2184.

Sincerely,

James K. Hartman
Assistant Manager
for Environmental Management
